Projects vs Operations

DISCUSSION

How do you handle projects?

Do projects cause you stress or are they well-handled?

SOFPM

Projects vs Operations

Organizational Objectives

STRATEGY

“A plan of action or policy designed to **achieve a major or overall aim.**”

The art of planning and directing overall military operations and movements in a war or battle.”

(Oxford Dictionary)

SOFPM

Project Outcomes

The results, benefits, or changes that occur because of the project outputs

Often seen after the project ends, and usually outside the direct control of the project team.

SOFPM

Project Outputs

Tangible deliverables or products that the project produces. These are typically completed at the end of the project and are within the control of the project team.

SOFPM

Operations (Civilian)

The activities that businesses engage in **daily** to increase the value of the enterprise and earn a profit.

SOFPM

Operations (Military)

In reality, the Operations
(3 Shop) does little more
than manage projects
constantly.

SOFPM

A **temporary** endeavor undertaken to create a unique **product, service or result**.

Projects

SOFPM

Projects vs Operations

Key Words:

TEMPORARY and **UNIQUE**

SOFPM

Up-front financing

OUTCOME DRIVEN

SUCCESS isn't guaranteed.

Should we **BE DOING** this project?

Where do your **RESOURCES** come from?

Projects require **SIGNIFICANT** financial resources.

SOFPM

“A project is not just the deliverable; it is the entire process from scope definition to the acceptance of the deliverable. We have to train people for the journey, not just the destination.”

James T. Brown

“The Handbook of Program Management”

SOFPM

Programs and Portfolios

Programs

A program is a **collection of projects** managed as a group in order to achieve efficiencies of scale.

SOFPM

Programs

Projects are bundled together into a program when the **benefits** of managing the collection outweigh managing projects as individual units/efforts.

SOFPM

Program Management

SOFPM

A Portfolio is a collection of **projects, programs** and operations managed as a group to achieve strategic business objectives.

Portfolios

SOFPM

Unlike **projects** (which deliver specific outputs) and **programs** (which manage interrelated projects to deliver coordinated benefits) a **PORTFOLIO** is concerned with prioritizing, balancing, and aligning all initiatives within the organizations overarching strategy.

Portfolios

SOFPM

Portfolios Key Characteristics

Strategic Alignment: Ensures that resources are allocated to the initiatives that best support business goals.

Centralized Oversight: Provides visibility into performance, risk, and resource usage across all components.

No Need for Interdependency: Projects or programs within a portfolio do not need to be related or dependent on each other.

Dynamic in Nature: Portfolios are reviewed and adjusted regularly to respond to shifting priorities, budgets, or market changes.

The Project Lifecycle

The Project Lifecycle

SOFPM

Phases and Costs

Each project phase has associated **financial costs** and **resource expectations** which must be both managed effectively and **communicated** to project **Stakeholders**

SOFPM

Constraints

**“Accomplish more with less.
Constraints breed resourcefulness, self-
sufficiency, and invention.”**

John Rossman

“The Amazon Way”

Constraints

A **limitation** or **restriction** within your organization or project.

SOFPM

Constraints are driven by **RESOURCES**

Project resources are the **people, capital, time, and/or material goods** required for the successful execution and completion of a project.

SOFPM

The Triple Constraints

Also known as the **Iron Triangle**

48% of all worldwide projects
finish later than planned

52% of all worldwide projects
experience **uncontrolled** changes to
scope

43% of all worldwide projects **cost**
more than originally planned

SOFPM

It's not always a triangle...

SOFPM

Project Scope

Determines and documents the project:

GOALS

DELIVERABLES

SOFPM

Project Time

A timeline (**schedule**) is analyzed and developed for the completion of a project or deliverable.

SOFPM

Project Cost

The project cost is all costs required to procure all the needed **products**, **services** and **resources** to deliver the project successfully.

SOFPM

How do we achieve project quality?

$$\text{QUALITY} = \text{TIME} + \text{COST} / \text{SCOPE}$$

SOFPM

Fast, Cheap or Good?

Pick **Two**

SOFPM

“What can’t you do because you are doing this? This is especially important for small teams with constrained resources.”

Jason Fried and David Heinemeier Hanssen

“Rework”

Constraints and Desires Drive the Project

Feasibility: Can we pull this off?

Project Costs: Are we constrained by what we can spend?

Net Financial Impacts: How much profit are we expecting?

Organizational Impacts: What does this project cost us in finances, people or time?

Other Impacts: Is it a win or loss somewhere else (socials, marketing, etc)

Organizational Risk: How much failure are we tolerating?

SOFPM

Constraints and Desires Drive the Project

(We'll be discussing **Multi-Criteria Analysis** in depth in an upcoming session).

Multi-Criteria Analysis	
CRITERIA	WEIGHT
Feasibility	1
Project Costs	3
Net Financial Impacts	2
Organizational Impacts	2
Other Impacts	1
Organizational Risk	1

SOFPM

Requirements

Project Requirements

Clear set of **parameters and goals** of the project driven by project **Stakeholders**

FEATURES

FUNCTIONS

TASKS

SOFPM

Requirements Analysis

Requirements analysis is a process used to determine the **needs and expectations** of a new product.

SOFPM

Requirements Analysis

It involves frequent communication with the stakeholders and end-users of the product to define expectations, resolve conflicts, **and document all the key requirements.**

SOFPM

Requirements Analysis

Step 1: Identify Key Stakeholders and End-Users

Step 2: Capture Requirements

Step 3: Categorize Requirements

Step 4: Record Requirements

SOFPM

DISCUSSION

Can a project ever have too much time or too much money?

PROFESSIONALS)

Scope Creep and Scope Retreat

Scope Creep

Deliverables, or features of a project **EXPAND** from what was originally set - without being accounted for in additional time or budget.

Project goals not intended are accomplished.

SOFPM

Scope Retreat

Deliverables, or features of a project **RETRACT** from what was originally set - without being accounted for in additional time or budget.

Intended project goals are NOT realized.

SOFPM

DISCUSSION

**Does you typically suffer worse from Scope Creep
or Scope Retreat?**

Methodologies and Failure

Predictive versus Agile

Agile

SOFPM

Top 5 Reasons Projects Fail

Reason	Description	Estimated % of Failed Projects Affected in the US
Poor Requirements and Scope Creep	Unclear goals, missed requirements, or uncontrolled changes	35-40%
Lack of executive support	Weak sponsorship, misalignment, or absentee leadership	30-35%
Unrealistic Timelines/Budgets	Overpromising, inaccurate estimates, poor resource planning	28-32%
Poor Communication	Misunderstood goals, updates, or stakeholder needs	25-30%
Ineffective Project Management	Weak planning, poor risk handling, or scope/schedule control	20-25%

SOFPM

DISCUSSION

Why do you think your projects typically fail?

SOFPM

“When Price Waterhouse Cooper conducted a 21st century survey of 200 global companies about their Project Management maturity, they found that over half of all projects fail, and only a meager 2.5% of corporations consistently meet their targets for scope, time, and cost.”

Frameworks Key Points and Take-aways

Key Points from Frameworks

Projects differ from Operations as they are **temporary** and run through a **unique** lifecycle

Project Quality is constrained by Scope, Time and Cost (also known as "**the iron triangle**")

Having a project methodology is key to **success**
